Pagar Figure
Batak
Sumatra, Indonesia
19th Century
Height: 38 cm
Provenance:
Emile Deletaille, Brussels
Price on Request

Pagar figures are protective agents and used by Shamans in a ritual capacity. They protect and ward off evil. This example from the Batak has a stern face and focused demeanor. The disproportionately large head in contrast to the rest of the body is common to most Pagar figures. It stands tall, contained, with legs closed together and hands placed in a diamond shape over the front of the body. This example is missing a stomach cavity, where magical substances would have been placed during divination.

This rare figure in hunkered form is known as a Hapag. It was placed in a shaman's box and used during important rituals. This example is beautifully conceptualized; the face is very expressive, with ears projecting outwards on each side of its head. The body is well carved with thin limbs exposing vast negative space. The surface is deep and encrusted from numerous ritual libations. In excellent condition.
